## Laboratorio di Amministrazione di Sistema (CT0157)

parte A : domande a risposta multipla

- 1. What is the purpose of the user's full name in the New User account box?
  - a) It is informational only.
  - b) It authenticates the username.
  - c) It allows the user to logon.
  - d) It matches the user to permissions.
- 2. A network administrator is setting up a web presence for a small company. The company plans to use the address www.thecompany.com but has not created a DNS entry for the server yet. The administrator has set up a new web server on a networked machine with the IP address 111.111.111. What should the administrator initially do to determine if the web server is functioning?
  - a) Run a web browser on the server machine and enter the address http://127.0.0.1.
  - b) Run a web browser on a host connected to the same network and enter the address http://111.111.111.111.
  - c) Ask someone outside the organization to try to access the website using the address http://111.111.111.111.
  - d) Ask someone outside the organization to try to access the website using the address http://www.thecompany.com.
  - e) Run a web browser on a host connected to the same network and enter the address http://www.thecompany.com.
- 3. Which command can be used in Windows 2000 to capture the output from a printer port and redirect it to a network printer?
  - a) net use
  - b) capture
  - c) lpt1 > net
  - d) netprint

- 4. Which Windows file performs the same function as the Linux LILO files?
  - a) HAL
  - b) NTLDR
  - c) NTDETECT
  - d) NTOSKRNL
- 5. Which Linux command is used to temporarily change the default gateway of a host?
  - a) arp
  - b) ifconfig
  - c) netstat
  - d) route
  - e) ping
- 6. The performance of a network has dropped. Which command should an administrator use in a Linux system to determine which routers are causing the problem?
  - a) ping
  - b) traceroute
  - c) tracert
  - d) route
  - e) ifconfig
- 7. Which statement is true when the SUID bit is set as the root account for a program?
  - a) Root cannot execute the program.
  - b) Only root can execute the program.
  - c) Any user can execute the program using root account permission.
  - d) Users can execute the program only if they belong to the same group as the owner of the program.
  - e) Only the owner of the program can execute the program.
- 8. What is the best way for an administrator to determine if a server is overloaded?
  - a) ask users if the service has declined
  - b) keep a record of the frequency of server crashes
  - c) monitor the network load and note when it becomes very high
  - d) check the server log files

NB: questo foglio verrà ritirato dopo 15 minuti dall'inizio dell'esame.

## SPAZIO PER LA VALUTAZIONE: il candidato riporti su questo lato del foglio le soluzioni relative ai quesiti 1-8 a risposta multipla.

**Criteri di valutazione:** le domande 1-8 valgono un punto per ogni quesito corretto, mentre le domande 9-12 valgono sei punti ciascuna (al massimo, graduati in base alla correttezza della risposta).

**Per chi ha presentato il progetto:** il progetto viene valutato al massimo 12 punti, mentre la seguente prova si intende limitata alle domande dall'1 al 10. I quesiti 1-8 valgono un punto per ogni risposta corretta, mentre le domande 9 e 10 valgono sei punti ciascuna (al massimo, graduati in base alla correttezza della risposta).
